```
Java
class Solution {
    public int duplicateNumbersXOR(int[] nums) {
JavaScript
 * # @param {number[]} nums
 * @return {number}
var duplicateNumbersXOR = function(nums) {
};
TypeScript
function duplicateNumbersXOR(nums: number[]): number {
};
C++
class Solution {
public:
```

```
int duplicateNumbersXOR(vector<int>& nums) {
};
C#
public class Solution {
   public int DuplicateNumbersXOR(int[] nums) {
Kotlin
class Solution {
   fun duplicateNumbersXOR(nums: IntArray): Int {
Go
func duplicateNumbersXOR(nums []int) int {
```
